

ENTRY LEVEL POS TERMINAL

Fujitsu Services introduces TP-X

The Fujitsu Services TP-X PoS Platform is a new Point of Sale terminal designed to meet the demands of today's retailer at an affordable price.

With powerful Intel® processors and supporting Windows® operating systems, the TP-X retail-hardened multi-function terminal is fully RoHS compliant with proven reliability and comes with a low total cost of ownership. In terms of the Linux operating systems Fujitsu Services has to date conducted "initial lab testing" on the SuSE 9.3 platform. This does not constitute a support commitment and any usage on the TP-X platform of Linux requires validation/approval by the application provider.

TP-X is powerful enough to support a number of applications running on one terminal to reduce your dependence on multiple systems and vendors. It is available as a stacked or dispersed terminal and supports a number of Fujitsu and OEM peripherals, all validated by Fujitsu Services to meet CE approvals.

TP-X Specification

- Intel 1.3 GHz Celeron M CPU (equivalent to 2.3 GHz Pentium 4)
 - 1.6 GHz Pentium M (option)
 - 1.8 GHz Pentium M (option)
- Micro ATX form factor: Case size approx 325mm x 395mm x 95mm
- Memory : 256Mb can take up to 2 GB DIMM (DDR266/333) two memory sockets
- 6 Serial Interfaces
 - 4 powered (2 x 24V & 2 x 5V)
 - 2 Standard
- 2 low profile PCI slots for add on cards
- 6 USB 2.0 Ports
 - 4 powered USB (1 x 24V, 3 x 12V)
 - 2 standard
- 10/100 LAN
- Video: VGA 15 pin RGB connector
 - Second VGA Port (option)
- HDD 1 40 Gb (option of 80Gb)
 - Second HDD (option 40 Gb or 80Gb)
- CD Drive (CD-RW/DVD ROM) (option)

- Cash Drawers and Intelligent Cash Systems

As well as providing a complete set of quality own brand peripherals, Fujitsu Services works with "best of breed" peripheral suppliers and where applicable will expect those suppliers to provide drivers (JavaPoS and/or OPOS) for their respective peripherals. JavaPoS is largely platform independent and can exist on both Windows® and Linux operating systems while OPOS is only supported on Windows® operating systems.

TP-X – Dependable PoS from Fujitsu Services.
