

TP-TRIO *The Flexible, Small Foot-Print Terminal. A Powerful Platform for Multiple Applications.*

TP-TRIO: Three Point-of-Service Terminals in one.

Setting a new standard in versatility, the TP-TRIO can be simply installed on a counter-top as a traditional PoS terminal; mounted on a wall for customer self-service, or flush mounted into store furniture for demanding environments such as hospitality.

Based on the latest generation of Intel processors and graphics chips, the TP-TRIO has the power to run rich multi-media applications developed for Windows or Linux. With full support for Microsoft's latest operating system, Windows Vista, the TP-TRIO can be installed with confidence that tomorrow's requirements can be comfortably supported.

Designed from the ground-up for the retail and other environments, the touchscreen TP-TRIO provides full connectivity and power for standard retail peripherals, as well as options for an integrated 2D laser barcode scanner, MSR, customer display and fingerprint security sensor.

Key features:

- Versatile mounting options support deployment on the counter-top, as a pole or wall-mounted self-service kiosk, or integrated in a hospitality environment – one device for all your needs
- Customisable front bezel to incorporate house colours or custom logo - complements in-store design and maintains retail ambiance
- Latest generation of Intel processor and graphics scales performance from a standard workstation to high-performance multi-media display – runs all the applications today and tomorrow
- Integrated storage with one or two traditional hard disk drives, or solid-state flash memory facilitating fan-less operation with low-end CPUs – high reliability and quiet operation
- Bright integrated 15" Touchscreen display with support for second external device – show rich information to your customers and use idle terminals to display promotional messages
- PC functionality enhanced with optional integrated 2D laser scanner, fingerprint security reader and three track MSR – small footprint, high functionality
- Superior peripheral connectivity with six USB ports (four powered), six serial ports (four powered), cash-drawer port, LAN, plus expansion slot for wireless LAN module – all the devices you need from a single power outlet

Detailed Specifications:

- Processor, Memory & Chipset
 - Intel Core Duo/Solo Processor compatible
 - FSB 533/667 MHz supported
 - North Bridge: Intel 945GM
 - South Bridge: ICH-7M
 - 2x DDR2 533/667 MHz memory (2GB total)
 - AMI BIOS (SMBIOS v2.4 compliant)
- LCD Display
 - 15" TFT display with resistive or infrared Touchscreen
 - 1024x768 max resolution
 - Brightness 300 Cd/m²
 - Option for custom bezel
- Storage
 - Up to 2x 2.5" Hard Disc Drives (2nd drive installed in base)
 - 4GB Solid-State Flash drive supported
- Audio
 - On-board AC97 compatible audio
 - 2x integrated loudspeakers, 1.5W per channel
- Connectivity
 - 4x powered high-speed USB 2.0 ports
1x 24V, 3x 12V, boot capable
 - 2x standard USB 2.0 ports, boot capable
 - 6x RS232 serial ports
2x configurable with 12V or 5V and
2x with 24V power
 - 1x Cash-drawer port
 - 1x 10/100 Mbps Ethernet LAN
 - 2x PS/2 ports for Keyboard and Mouse
 - 1x VGA 15 pin for external display
 - Mini-PCI expansion slot for Wireless LAN module
- Power
 - Maximum 250W power
 - 2nd PSU housed in base for printer
 - Wall and Kiosk mounted systems require separate PSU for printer

- Optional integrated peripherals
 - 3 track vertical Magnetic Strip Reader
 - Fingerprint security scanner
 - 2D laser barcode scanner
- Operating System Support
 - Microsoft Windows Vista, XP Professional, WEPOS
 - SuSE Linux v9.3 – *subject to validation*

Mounting Options:

- TP-TRIO W
 - Counter-top mounting with integrated base stand incorporating main and printer power supplies
 - Splash-proof top surface to IP55
- TP-TRIO V
 - VESA compliant mount for wall or ergonomic mounting on Fujitsu *TeamPole*
 - External PSU
- TP-TRIO K
 - Supplied without casework for integration into custom enclosure
 - External PSU
